

c.f. "**God Calling**", October 25:

**The way of conquest over the material, the temporal, is learned by the conquest of the self-life in each of us.**

**Seek daily more and more to obtain this self-conquest, and you are gaining surely, though you may not see it, conquest over temporal forces and powers.**

**Unemployment would cease if man realized this.**

**If he has not work, let him make himself a conquering force, beginning with the conquest of all evil in himself, then in his home, then in all round him.**

**He will have become a force that will be needed, and *must* be employed.**
